Becoming a member of the rammed earth building forum is a great way to have access to the same building information as the participants of our building workshops. By becoming a member of the forum you will have access to a wealth of information, participate in online discussions with Environmental Designer Sharon Ponsford and all members of the rammed earth building forum.

Although in its infancy, over time forum members will post information and photos about their own rammed earth building projects, so the forum will become an invaluable resource for anybody contemplating their own rammed earth building projects.

Our rammed earth building forum was created for you, the rammed earth builder. It's your forum, created originally as a follow-up to the rammed earth building workshops, to ensure you obtain the best rammed earth building experience and information possible.

There are two ways to become a member of our rammed earth building forum:

1. Attend a hands-on rammed earth building workshop
2. Purchase a copy of my rammed earth building book (release date to be advised)

Rammed Earth Building E-Book Pre-order Special Offer

To ensure that you are not required to wait until a hands-on workshop or the release of my book in order to become a member of the forum and obtain some of the best rammed earth building advice and information, now you can pre-order the first to be released eBook version of my book and you will be given access to the members forum within 2 business days!

To pre-order my eBook and gain access to the members forum within 2 business days, just click on "eBook Pre-Order Special Offer" at the left of the page to find out more!

I look forward to hearing about many happy rammed earth builders and their projects on our members forum!

Sharon Ponsford,
Environmental Designer
